01 ABOUT GREAT HEIGHTS

GH Scaffolds is an Ajman-based scaffolding supplier and contractor offering steel and aluminium scaffolding, pipes and tubes, formwork and related access materials. The published business model combines supply or hire with erection, supervision, dismantling, design/load planning, fabrication, support and safety consulting.

Built around the project, not just the product

GH describes its workflow as site inspection, access design and material planning, supply, installation, and support/maintenance. This lets a customer ask for a complete access solution rather than having to assemble every component independently.

Steel Scaffolding

Cup-lock standards, ledgers, transoms, frames, braces, props and related components.

Aluminium Scaffolding

Lightweight mobile access systems for internal works, finishing trades and maintenance.

Ladders & Access

Industrial ladders, platforms and access components.

Building & Site Materials

Selected boards, plywood, timber and supporting site materials.

The product range shown in this catalogue is based on GH's published product information and supplied product list.

02 STEEL SCAFFOLDING SYSTEMS

A broad steel system range for construction, maintenance, industrial access and heavy-duty applications. GH·s range includes ladders, H-frames, intermediate transoms, cup-lock standards, prop jacks and push-pull props.

Cup-Lock Standards Vertical modular members for the main scaffold structure. Multiple heights are included in the GH range.	**Ledgers** Horizontal members connecting standards and forming the scaffold grid.
Transoms Intermediate and platform-support members available in multiple lengths.	**H-Frames** Welded frame systems for rapid assembly and access structures.
Cross Braces Diagonal bracing for frame stability and rigid scaffold bays.	**Single Braces** Straight diagonal bracing for frame and access configurations.
Cantilever Frames Project-specific extensions and support arrangements.	**Bracing Pipes** Horizontal and diagonal bracing components in multiple lengths.

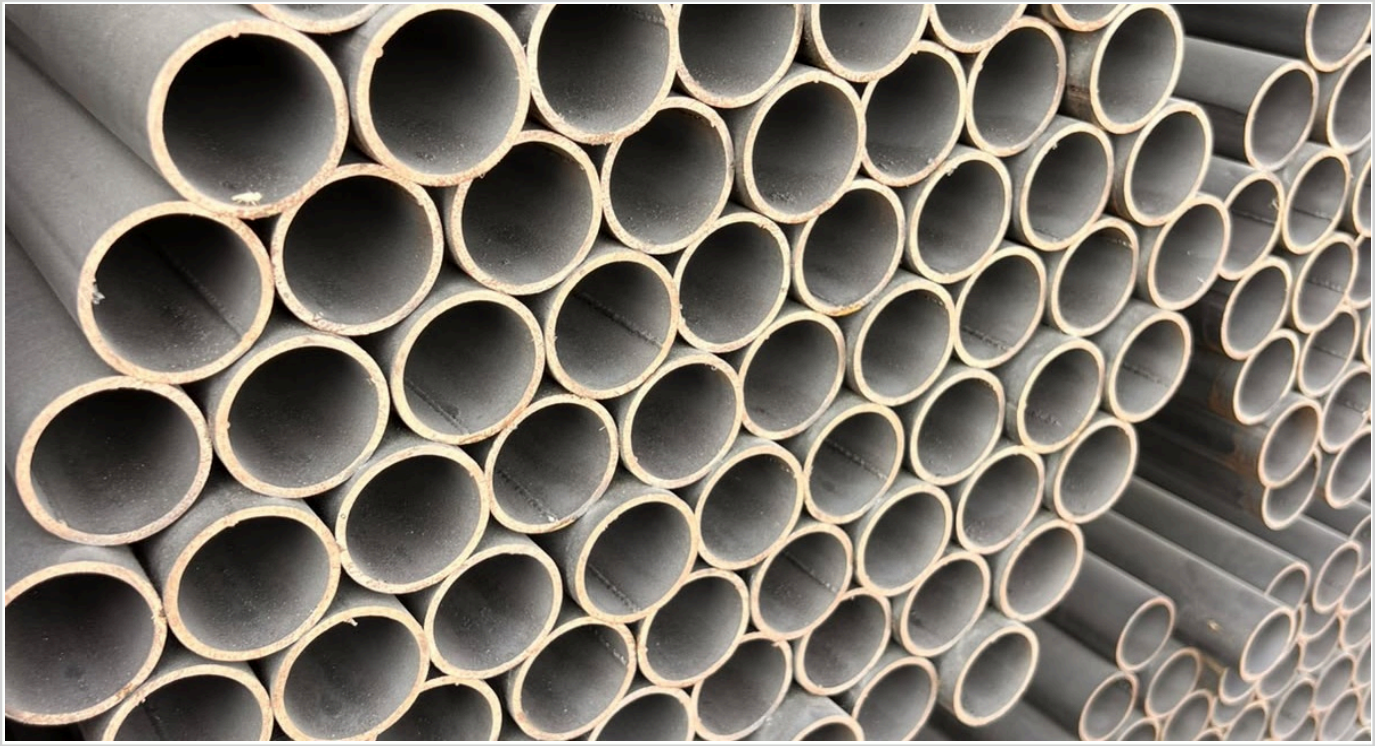

Featured UAE-market product families include cuplock, H-frames, tube-and-fitting and aluminium access systems.
These are commonly supplied for construction, maintenance and industrial work.

03 TUBE & FITTING SYSTEM

Tube-and-fitting components suit standard access, irregular layouts, temporary structures and site-specific bracing.
UAE market references commonly use 48.3 mm scaffold tube with right-angle, swivel, sleeve, putlog and beam/girder couplers.

Scaffold Pipes 48.3 OD steel scaffold tubes in several wall thicknesses and lengths.	**GI Pipes** Hot-dip galvanised scaffold/fabrication tubes in multiple lengths.
Double Couplers Fixed 90° tube-to-tube connection for conventional scaffold assemblies.	**Swivel Couplers** Angled connection for diagonal braces and non-90° arrangements.
Put Lock / Single Coupler Single-tube connection for platform and access arrangements.	**Grinder Coupler** Special-purpose fitting included in the GH product list.
Sleeve Clamp Inline tube connection for extending scaffold tube runs.	**Ladder Clamp** Connection accessory for scaffold ladder/access arrangements.
Base Plates Load-transfer support at the base of scaffold tubes.	**Pin with Nut & Bolt** Joining and connection hardware.
BRC Listed GH fitting/accessory.	**Jordan Clamp** Listed GH clamp/accessory.

04 ALUMINIUM SCAFFOLDING & MOBILE ACCESS

Lightweight aluminium access suits internal work, finishing trades and short-duration maintenance where the platform must be moved by hand.
GH includes aluminium scaffolding in its core product range.

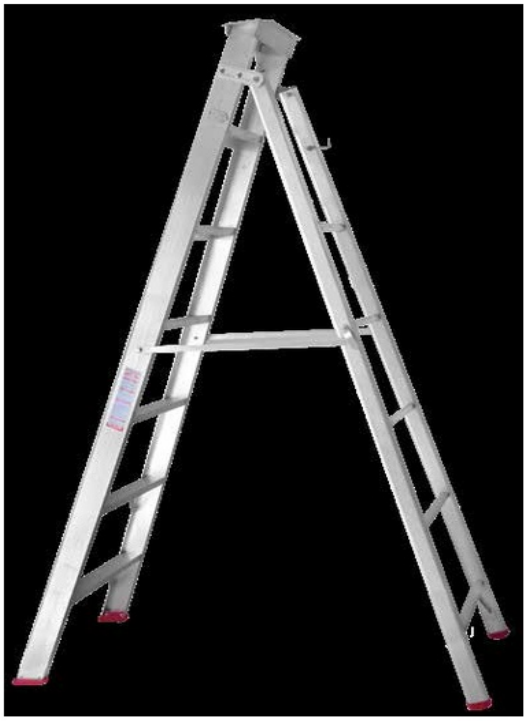

Ladder Frames 145 cm × 2 m and 80 cm × 2 m frame configurations are listed.	**Span Frames** 145 cm × 2 m and 80 cm × 2 m span-frame configurations are listed.
Platforms Plain platforms and trapdoor platforms for working access.	**Castor Wheels** 6-inch and 8-inch castor options in the GH product list.
Stabilizers 3.0 m, 4.5 m and 6.0 m stabilizer lengths are listed.	**Guard Rails** 1.0 m × 1.45 m and 1.0 m × 0.80 m configurations.
Aluminium Ladders 3 m, 4 m, 5 m and 6 m ladder lengths.	**Mobile Access Packages** Components can be combined into project-specific mobile access arrangements.

05 LADDERS, PLATFORMS & ACCESS EQUIPMENT

Aluminium Ladders Multiple lengths for site access, maintenance and finishing work.	**MS Ladders** Steel ladder options listed in the GH product range.
Steel Stairway 3.2 m × 1 m width stairway component listed.	**Trapdoor Platforms** Platform access where internal ladder access is required.
Plain Platforms Working platforms for scaffold access systems.	**Guard Rails** Perimeter protection and controlled working-platform access.
Castors Mobile tower movement components in 6-inch and 8-inch sizes.	**Stabilizers / Outriggers** Support components for mobile access tower stability.

Ask GH to configure the access package around the height, working platform, access route and site constraints.

06 JACKS, PROPS & SHORING

Adjustable support components are used for levelling, temporary support, scaffold bases and formwork/shoring arrangements. Products include adjustable steel props, U-heads and base jacks for slab support, formwork and temporary support.

Base Jack Adjustable scaffold base support and levelling component.	**Universal Jack** Adjustable support component in the GH product list.
U-Head Jack Top support/fork-head arrangement for beams and formwork.	**Prop Jacks** Multiple heights are included in the GH range from 1 m through 5 m.
Heavy-Duty Prop Jack 4.0 m HD prop option listed.	**Push-Pull Props** Multiple lengths from 3 m to 6 m are listed.
Push-Pull Prop Jack 2.0 m option listed.	**H20 Beams** Formwork support beams in several lengths.
Tie Rods 16 mm × 6 m tie rod listed for formwork support.	**Tie Rod Nuts** Matching connection hardware.
Tie Rod Plates Load-transfer/connection plates.

07 FORMWORK, SHUTTERING & BOARD SYSTEMS

GH's published range includes formwork and shuttering materials for concrete work, with props and support components to hold a pour in position. The supplied GH product list adds H20 beams, plywood, timber/LVL planks and steel boards.

H20 Beams 1.80 m, 2.45 m, 2.90 m, 3.60 m and 4.90 m lengths listed.	**Marine Plywood** 18 mm China marine plywood listed.
LVL Wooden Planks 3 m and 4 m lengths listed.	**Wooden Planks** 38 × 225 mm boards in 2 m, 3 m and 4 m lengths.
Steel Boards with Hook 1 m, 2 m and 3 m options listed.	**Steel Board without Hook** 3.0 m option listed.
Formwork Support Props, push-pull props, jacks and tie-rod components.	**Custom Formwork** GH publishes in-house fabrication for scaffold and formwork steelwork to project drawings.

08 STEEL & GI PIPES / TUBES

For scaffolding, fabrication and structural applications, GH publishes carbon steel and hot-dip galvanised pipes and tubes. The supplied product list includes 48.3 mm OD tubes in several wall thicknesses and lengths.

RANGE	CONFIGURATION
Steel scaffold tube	48.3 OD × 1.8 mm × 6 m
Steel scaffold tube	48.3 OD × 2.8 mm × 6 m
Steel scaffold tube	48.3 OD × 3.2 mm × 3 m / 4 m / 6 m
GI scaffold tube	48.3 OD × 3.2 mm × 2 m / 3 m / 4 m / 6 m
Bracing pipe – horizontal	2.5 m and 1.8 m
Bracing pipe – diagonal	2.7 m and 2.0 m

Need a different wall thickness, length or fabrication size? Ask the GH team about the project requirement.

White Wood

4 × 4, 4 m item listed in the GH product list.

Marine Plywood

18 mm China marine plywood.

Wooden Planks

38 × 225 mm scaffold/working boards in several lengths.

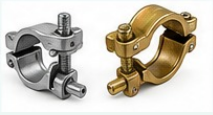

LVL Planks

Engineered timber planks in 3 m and 4 m lengths.

Steel Boards

Hooked and non-hooked board options.

Scaffold Accessories

Connection, support and access components to complete scaffold packages.

Safety Equipment

GH publishes safety products alongside scaffold hire and installation.

Building Materials

General supporting materials can be supplied alongside access equipment.

12 MORE THAN MATERIAL SUPPLY

Supply or Hire Purchase, rental or a mixed arrangement depending on the project programme.	**Erection & Dismantling** Trained site teams can erect, supervise and dismantle the agreed scaffold system.
Design & Load Planning Working loads, leg loads, tie positions and access layout planned around the actual structure.	**Steel Fabrication** Custom scaffold and formwork steelwork can be fabricated for project requirements.
Heavy-Duty Support Support and maintenance for plant, tanks, structures and long-running access requirements.	**Safety Consulting** Access planning, inspection routines, handover practice and safe working guidance.
Delivery & Collection Material delivery and collection can be coordinated with the project programme.	**Project Support** Adjustments and modifications can be handled as the work front changes.

These services are described on the current GH website

14 TELL US WHAT YOU NEED

WE WILL HELP BUILD THE MATERIAL PACKAGE AROUND YOUR PROJECT

SEND YOUR DRAWING • SITE LOCATION • HEIGHT • ACCESS REQUIREMENT • DURATION

Ask us for the product, size, system or complete access package you need. We can discuss supply, rental, installation, dismantling, design and project support. The catalogue is intentionally an enquiry document — exact availability, configuration and pricing are confirmed by GH.
